ASTM E84 Plastics/Polymers Policy

Please note that all plastics and/or polymeric materials are charged at a higher test fee because of the required cleanup of the tunnel after testing.

SGS Govmark limits flame spread and smoke developed evaluation of plastics and other polymer based compounds of **unknown** combustibility and smoke generating characteristics to a maximum thickness of 0.125" and submitted in flat sections only sufficient to achieve the required specimen length.

Specimens of greater thickness may be conducted if, after screening by lab personnel, a judgment is rendered to proceed to test.

The test will be terminated **at any time** when:

1. The smoke developed exceeds 500 rendering the material unclassifiable;
2. The temperature at the 24-ft. end of the tunnel exceeds 1,250°F; OR
3. When, in the judgment of the test operator, the safety of personnel or the threat of the equipment and/or environment is deemed to be probable.
